Message from the Guest Editor

This Special Issue will comprise papers covering a wide range of aspects related to the Black Sea ecosystem assessment, state and protection. The Special Issue will refer to and utilize to the new knowledge, project achievements, current investigations of various experts working in the Black Sea basin and beyond. It aims to bring together researchers and academic scientists to exchange and share their experiences and research results on all aspects of the Black Sea ecosystem development and state. This Issue also will provide a premier interdisciplinary platform for researchers to present and discuss the most recent innovations, trends, and concerns as well as challenges encountered and solutions adopted in the main topic field.

Evidence-based and original articles addressing the following topics are welcome:

- Biological diversity and new species introduction
- Marine pollution state
- Black Sea ecosystem assessment and monitoring
- Climate change
- Marine living resources
- Marine protected areas
