Message from the Guest Editor

Resource recovery is one of the main workhorses of the circular economy. Companies active in resource recovery face the challenge of linking two different worlds: waste producers and the manufacturing industry using recovered resources. This Special Issue focuses on the business aspects of resource recovery, from theoretical work to case studies and experiments. The scope of the work includes, but is not limited to, the following:

- Barriers to and drivers of resource recovery;
- Technological enablers of resource recovery;
- The pricing of recovered resources;
- Managing the interface between waste producers and the manufacturing industry using recovered resources;
- The role of resource recovery in circular supply chains;
- The KPIs of resource recovery;
- The application of process improvement methods (e.g., lean manufacturing) to resource recovery;
- Resource recovery in developing countries and transition economies;
- The recovery of biological nutrients;
- The recovery of technological nutrients

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
