Message from the Guest Editors

Dear Colleagues,

Demand is an underlying driving force for supply, and, therefore responsible for all associated environmental impacts generated in production.

Intense consumption behavior from the rich and middle-class in maintaining their lifestyles has led to them becoming major emitters, while rising demands from the poor when attempting to escape poverty has led to them becoming growing potential emissions contributors; We also live in an aging world. The increasing numbers of old people and low birth rates in many countries may reduce consumption, while a young and vivid population structure has emerged in others, bringing fresh purchase power and stimulating consumption as well as consumption-related emissions.

This Special Issue will publish high-quality research papers on the inter-disciplinary field of carbon emissions related with economic consumption in the context of diverse socioeconomic backgrounds at a global or regional scale.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
