Message from the Guest Editors

The circular economy concept is receiving growing attention as an alternative to the current linear economy “take, make, waste” concept. The circular economy conceives of a system with a minimum loss of resources in the production system through the reuse, recycling and recovery of materials and energy. Moving toward a circular food system is highly important, due to the huge greenhouse gas emissions, water and energy footprints of the food supply chain. In this regard, measuring the circularity of the food production systems is the first step in the process of moving towards a circular food production system.

Given the importance and relevance of this Special Issue, we invite researchers to contribute original research articles as well as review articles. Potential topics include, but are not limited to:

- Measuring circularity in food supply chain
- Life cycle assessment of food production
- Sustainable food systems
- Food waste valorization
- Circular future food

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access:— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and many [other databases](#).

Journal Rank: [JCR](#) - Q2 (*Environmental Sciences*) / [CiteScore](#) - Q1 (*Geography, Planning and Development*)
