Message from the Guest Editor

This Special Issue (SI) entitled “Sustainable Integrated Clean Environment for Humans and Nature” is proposed for the “Sustainable Use of the Environment and Resources Section” of *Sustainability*.

The SI seeks to find answers to the following questions:

1. What is the **current condition** of our environment? Is it **clean**?
2. How can we **make our environment clean** and suitable for humans and nature? (*Technical Approaches*)
3. How can we **keep our environment clean sustainably**? (*Economic & Social Approaches*)

The SI also aims to gather relevant studies on “Clean Environment”. It appeals for original and novel studies on different types of environments, including anthroposphere, atmosphere, biosphere, hydrosphere, and lithosphere. Each study may fall within one category of technical, economic, and social approaches. Meanwhile, a balance between these approaches is required.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access:— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and many other databases.

Journal Rank: [JCR - Q2 \(Environmental Sciences\)](#) / [CiteScore - Q1 \(Geography, Planning and Development\)](#)
