Deadline for manuscript  
submissions:

**closed (31 May 2022)**

### Message from the Guest Editor

This Special Issue will consider how economic criteria can best be implemented in order to retain robustness in economic analysis, while allowing for the fact that there are often limited resources available for such an analysis. This challenge will need to be addressed across a range of contexts, including in the following: the management of extreme weather events modified by climate change, which have high impact costs in the short term; appraisal of projects where the costs of climate risks are borne over long time periods; appraisal of flows of large-scale investment funds where the case for climate resilience needs to be made; macro-economic and strategic-level decisions at a national scale; and the appraisal of overseas development assistance aimed at reducing the damage costs of climate risks in less developed countries.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
