Message from the Guest Editors

Dear Colleagues,

This Special Issue focusses on research into the impact of climate change on hydrohazards. Submissions should push the envelope and demonstrate a holistic approach (systems thinking). Suggested topics include:

- Impact of climate change on urban areas;
- Mapping-projected hydrohazards and their uncertainties to specific locations;
- Exploration of multiple possible future scenarios, in terms of natural *and* societal aspects;
- Novel, post-hazard engineering or adaptation responses;
- Focus on decision support, in the design of engineering/policy interventions to increase urban resilience;
- Quantification of how urban vulnerability to hydrohazards may change over time;
- Novel methodologies, or applications of novel data, toward the above points—including, e.g., multimodel approaches, participatory methods.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access:— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and many [other databases](#).

Journal Rank: [JCR](#) - Q2 (*Environmental Sciences*) / [CiteScore](#) - Q1 (*Geography, Planning and Development*)
