submissions:

28 February 2022

Message from the Guest Editor

Both global climate change and air pollution are at the forefront of current global public health challenges. Climate change is anticipated to raise overall temperatures in the 21st century and will have profound impacts on human health, ranging from heat-related disorders, allergic and respiratory disorders, infectious diseases, to mental health impacts and violence. Exposure to ambient air pollution causes a wide spectrum of adverse health outcomes, from acute respiratory symptoms to premature death. Air pollution is currently the world's largest environmental risk. The threats of climate change and air pollution are interrelated, and are closely linked to overpopulation, poverty, socioeconomic injustice, and deteriorating human health. Our current interactions with nature are not sustainable.

We invite high-quality research submissions covering a broad range of global climate change, air pollution, related health outcomes and social dimensions of health.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access:— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and many [other databases](#).

Journal Rank: [JCR](#) - Q2 (*Environmental Sciences*) / [CiteScore](#) - Q1 (*Geography, Planning and Development*)
