### Message from the Guest Editors

In the context of carbon neutralization, Climate change has attracted great attention and related studies have been developed rapidly in recent years. The associated study on the mechanisms and assessment on the impact, mitigation, and resilience of climate change is consistent with the aims and scopes of SUSTAINABILITY. Based on this, the journal “SUSTAINABILITY” is planning to organize a virtual special issue aims to “Climate Change Research Toward Sustainable Agriculture”. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but not limited to) the following:

- 1) Interaction between climate change and agricultural production
- 2) Physiological processes for mitigation and adaptation in agriculture
- 3) Interaction between carbon/Nitrogen cycling and climate change
- 4) Impact of climate change related agricultural activities on environment quality including atmospheric, soil and water

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.
