Coastal Ecosystems: Monitoring, Management, Restoration, Preservation, and Valuation

Message from the Guest Editor

Dear Colleagues,

Coastal ecosystems are vital to human survival and well-being. This Special Issue of Sustainability seeks papers that provide case studies of coastal ecosystems that focus on solutions to the diverse challenges associated with the following: Understanding coastal processes, mitigating damage to coastal areas, sustainable management of coastal lands, and enhancing human value of coastal ecosystems for the fundamental contributions coastal ecosystems make to human well-being.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High visibility:** indexed by the Science Citation Index Expanded and Social Sciences Citation Index (Web of Science), as well as Scopus and other databases.

**Rapid publication:** manuscripts are peer-reviewed and a first decision provided to authors approximately 16.1 days after submission; acceptance to publication is undertaken in 4.9 days (median values for papers published in this journal in the second half of 2018).
