# Understanding and Improving Coastal Restoration: Considering Social Dimensions, Ecosystem Services, and Biodegradable Materials

Guest Editors:

Dr. Linda J. Walters

Dr. Kelly M. Kibler

Dr. Lisa G. Chambers

Dr. Timothy L. Hawthorne

Dr. Giovanna McClenachan

Deadline for manuscript submissions: closed (31 May 2022)

## **Message from the Guest Editors**

Human activities fundamentally alter natural systems, threatening the sustained production of critical ecosystem services and future resilience of coupled human-natural systems. Restoration is one of the few human activities that benefits ecosystems. Through restoration, humans are inextricably linked to the natural systems they seek to renew. The natural system ideally responds to restoration through enhanced functionality, ecosystem services production, and resilience to perturbation. Furthermore, maximizing restoration impact also involves human behavioural changes or collective actions that generate adaptive capacity. As humanity changes its views on certain topics, restoration must follow. Many coastal restoration projects have recently received negative reviews from the public at large for the use of plastic materials in the construction of breakwaters, oyster reefs, etc.

The goal of this Special Issue is to bring together current research in the ecological, engineering, economic, and social dimensions of marine, coastal, and freshwater restoration, to globally share and improve our understanding of these important topics and increase our adaptive capacity.

## **Editor-in-Chief**

#### Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario Institute of Technology, Oshawa, ON L1G 0C5, Canada

## **Message from the Editor-in-Chief**

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. Sustainability publishes original research articles, review articles and communications, I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering and applications of sustainability-based measures and activities.

#### **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
