### Message from the Guest Editors

Dear Colleagues,

What role do local food systems play in helping to transform pathways to sustainability? Are there considerations that need further exploration? What works and why? What are the connection points between community development and local food systems for fostering sustainability? We seek manuscripts for this Special Issue addressing these and other questions about the interface and connection between sustainability and local food systems. These include research papers, communications, and review articles. *Sustainability* is an interdisciplinary journal, and we encourage manuscripts that offer perspectives across domains of community development and local food systems. We invite you to send an abstract for a manuscript to us at the email addresses below, or to submit a manuscript for review. The abstracts will be reviewed by the editorial team, and invitations will be sent afterwards for full manuscript development.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
