closed (30 September 2021)

Message from the Guest Editors

Communities of citizens, market parties, and civil society actors are increasingly seen as engines of change in a recent phenomenon of citizen participation in urban developments. These non-traditional players and stakeholders are stepping up in diverse and varied constellations to transform their immediate environments with their communities. This phenomenon has challenged how conventional planning power structures and hierarchies might adapt to the dynamic and ever-changing needs of citizens and market parties in search of livability, wellbeing, and sustainable development. This special issue invites submissions that discusses and challenges who make up these communities, which aspects of social learning and innovation are at play and what are the boundaries that needs to be considered for co-creating and co-designing community-linked sustainable urban developments.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
