

Computational Modeling Techniques in Sustainable Materials, Systems and Structures

Guest Editors:

Prof. Dr. Panagiotis G. Asteris

Computational Mechanics
Laboratory, Department of Civil
Engineering, School of
Pedagogical and Technological
Education, Athens, Greece

Dr. Hai-Bang Ly

University of Transport
Technology, Hanoi, Vietnam

Deadline for manuscript
submissions:

closed (31 January 2021)

Message from the Guest Editors

Recent efforts and guidelines aiming to lower the environmental impact and footprint of materials, systems, and structures have led the scientific community to the development of eco-friendly materials. However, despite the importance of eco-friendly materials, they have not as yet been studied to the extent necessary for their wide application, in contrast to typical widely-used materials. This highlights a demand for the use and development of advanced computational techniques, aiming to reveal the nature and behavior of developed eco-friendly materials, thus facilitating their use in an effort towards achieving sustainability.

The focus of this Special Issue is the development of computational methods for solving problems in the fields of sustainable materials, systems, and structures. Furthermore, please see below a list of potential keywords about the proposed journal.

an Open Access Journal by MDPI

Editor-in-Chief

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
