Message from the Guest Editor

Landscapes all over the world are at a growing rate affected by agricultural intensification, forest management activities, industry, transport, water regulation, and urbanisation, as well as the abandonment of rural areas. Intensive management, especially during the past century, has seriously altered human-dominated landscapes and caused severe biodiversity loss. Exploring historical management reasons and their various consequences is inevitable for developing and implementing conservation efforts. In this special issue, we invite case studies to describe some top issues on the potential drivers of landscape change that provide evidence to underpin future policy development and conservation management.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
