Deadline for manuscript submissions:  
**closed (1 January 2023)**

### Message from the Guest Editors

Three key global theoretical trends in supply chains have been identified for three components of global changes, indicating their developmental potential:

The digital supply chain to support Industry 4.0. The shift from a traditional supply chain to a digital supply chain (will be supported by the next generation of low-cost robotics) appears as a necessity;

The resilient supply chain (ability to anticipate, prepare for, adapt to incremental change and sudden disruptions) to counterbalance unforeseen black swan events, as is the case with the COVID-19 pandemic;

The sustainable supply chain to support, among others, the positive behavior of producers and consumers (economic, social, and environmental, the combination and balance of which is supposed to result in equilibrium in the economy).

This transformation will require new management strategies. This Special Issue on “Sustainable Coordination in Supply Chain Management—Risk Factors in Ensuring Coordination and Cooperation in Supply Chains and Actively Strengthening the Reliability of Supply Chains” intends to collect the newest studies in the field.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
