Deadline for manuscript  
submissions:

**31 March 2022**

### Message from the Guest Editor

Local, regional, and global environments are subject to a range of diffuse contamination issues that are caused or exacerbated by human activity. Some of these involve naturally occurring elements and compounds, whereas others relate to xenobiotics. Some are inconsequential, whereas others may pose serious threats to ecosystems, human health, and economic activity. Many are only poorly or partially characterized.

In this second Special Issue devoted to diffuse contamination of the environment, we invite any papers that explore the spread, status, environmental behavior, and/or potential significance of any instance of diffuse contamination, from heavy metals to microplastics. Papers relating to any diffuse contamination issue are welcomed, and the scope is wide to facilitate a broader conversation.

The selected topic may:

- involve one element or compound, or a class or category of substances;
- focus on one environmental compartment or be multicompartmental;
- take the form of a research paper or a systematic review article;
- include the results of specific monitoring investigations, or modeling studies, or applicable

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:**— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High visibility:** indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and many [other databases](#).

**Journal Rank:** [JCR](#) - Q2 (*Environmental Sciences*) / [CiteScore](#) - Q1 (*Geography, Planning and Development*)
