Message from the Guest Editors

This Special Issue invites papers that explore the use of digital technologies in the Middle East from a wide range of perspectives, including methodological issues, interpretative developments, their use in heritage (e.g., museums or outreach), and how they have transformed understanding of object, building, site or landscape. We are interested in both success stories and reports of what has not worked so well and challenges faced. Discussions of the use of digital technologies in areas suffering from conflict or in post-conflict situations are also encouraged.
