Message from the Guest Editors

This Special Issue aims to present a platform for the exchange of the latest research and practices in post-disaster recovery and climate change adaptation in the Asia-Pacific region. Themes of particular interest include reasons for current inadequacies and context-specific challenges contributing to failed recovery and adaptation in the region, lessons learnt from past disaster experiences, innovative post-disaster reconstruction and recovery practices, and sustainable and practical solutions for adapting to climate change that are applicable to the Asia-Pacific region. We are seeking articles duly addressing environmental, cultural, economic and social aspects of post-disaster recovery and climate change adaptation within the scope of *Sustainability*.

Original research articles and reviews are welcome. Research areas may include (but are not limited to) the following:

- Post-disaster reconstruction and recovery;
- Disaster preparedness and resilience;
- Disaster risk reduction;
- Building back better;
- Building back safer;
- Climate change adaptation;
- Climate-resilient development;
- Participatory methods;
- Indigenous knowledge;
- Nature-based solutions.
