Message from the Guest Editors

There are more and more online technologies and platforms that facilitate the learning process, making it more effective, interactive, and interesting for students. Teachers and the administration of schools and universities should successfully implement e-learning processes, taking into account the labor market requirements as well as the sustainable education principles. Education for sustainable development can be considered as education that encourages changes in knowledge, skills, values, and behaviors to enable a more sustainable society. Education should encourage the development of critical thinking as well as such qualities that will enable one to predict the course of events in the future and make joint decisions. The latter requires new approaches to learning, the development of dynamic and environmentally friendly societies and economies, as well as the development of global citizenship. Highly effective educational management should be established not only within a separate educational institution, but also in the whole educational system, at the state level.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
