### Message from the Guest Editors

So far, limited attention in the extant literature has been devoted to strategies, initiatives, and policy measures to go beyond the limits of the recycling economy. The purpose of this Special Issue is to fill this gap by providing theoretical, conceptual, and empirical studies on CE approaches to WEEE management, measures, and initiatives aimed at reducing WEEE generation through the involvement of different stakeholders (e.g., consumer, producers, regulators, policymakers, service providers, and others). Specifically, the scope of this Special Issue is related to identifying those strategies, approaches, and methods employed to properly prevent or reduce the e-waste generation that mainly involve (W)EEE management strategies to keep products/parts in circulation. We also welcome papers that identify problems with the growing EEE waste stream, especially research from the Global South.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:**— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High visibility:** indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and many [other databases](#).

**Journal Rank:** [JCR](#) - Q2 (*Environmental Sciences*) / [CiteScore](#) - Q1 (*Geography, Planning and Development*)
