### Message from the Guest Editors

Dear Colleagues,

This Special Issue on “Eco-Sustainable Development and Circular Economy” represents a forum for experts such as management scientists, engineers, economists, social and political scientists, and industry experts to discuss, in a systematic way, the concepts of circular economy and eco-sustainable development, to bring a new and interdisciplinary approach to these two concepts. Focusing on reducing non-renewable resources and introducing innovative and eco-sustainable elements into the consumption phase makes the circular economy an important strategic model to address substantial environmental challenges, such as resource scarcity, global warming, and waste management, as well as economic, human, and technological changes. The focus of this Special Issue on “Eco-Sustainable Development and Circular Economy” aims to bring a new and interdisciplinary approach to these two concepts, circular economy and eco-sustainable development.
