Deadline for manuscript
submissions:

closed (31 December 2020)

Message from the Guest Editors

Dear Colleagues,

This Special Issue is devoted to the use of nontoxic, readily accessible, renewable, waste/biomass-derived, recyclable, low-carbon materials as sustainable alternatives. This SI seeks scientific findings in the format of research articles, reviews, or perspective analyses on progressive research toward exploring ecofriendly materials and clean energy aspects in conjunction with the specific challenges encountered. Alternate technologies, case studies, ecodesign, innovative processes, business models, and policy and management in the domain of ecofriendly materials and clean energy are topics suitable for manuscripts submitted to this SI. Comprehensive analyses of environmental, economic, and social aspects, such as life cycle assessment (LCA) of materials and energy, to substantiate the sustainability of materials or energy are also anticipated.

an Open Access Journal by MDPI

Editor-in-Chief

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
