Deadline for manuscript  
submissions:

**closed (10 May 2021)**

### Message from the Guest Editors

Productivity is often acknowledged as the most important determinant of a country's average living standards and wealth, and its growth is generated by increasing output value or reducing inputs. As the circular economy aims to minimise waste through system redesign and material loops, it appears intuitive that it should promote productivity growth. A stream within the literature seems to support this idea by highlighting the theoretical potential for creating value through the application of circular principles and strategies. However, other articles reveal several of the difficulties and costs firms can face when implementing them. There is therefore a lack of consensus on whether the circular economy contributes to productivity—in particular labour productivity—at the firm, supply chain or national levels.

In this Special Issue, our purpose is to compile articles that contribute to the understanding of the impact of the circular economy on productivity.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
