Message from the Guest Editors

This Special Issue aspires to provide a forum for the discussion of challenges and opportunities and for an exchange of lessons and knowledge regarding the parameters and methods that make educational efforts effective at promoting pro-environmental behaviors worldwide. It invites reflections on initiatives that aim to cultivate such behaviors, from both the formal and informal education sector and relating to curricular and operational efforts. It welcomes both theoretical reflections and case study analyses, and it aims to attract contributions from those concerned about how we effectively mobilize pro-environmental behaviors and social practices, as we urgently need to transition toward sustainable communities.
