Message from the Guest Editors

Learning about sustainability and the impact that one has on the planets ecosystems is critical if we are to have a citizenry that internalizes sustainable policies and practices that lead to more just and healthier socio-ecological systems. Learning technologies offer a powerful way to engage learners in exploration of sustainability concepts, especially many emerging technologies such as the Internet of Things, artificial intelligence, computational modeling, and data visualizations, to name a few. This Special Issue of Sustainability will provide a core knowledge base for understanding and progressing cutting-edge theory and practices for the use of learning technologies to support learning about sustainability issues. We encourage researchers and practitioners to submit original research contribution that may be articles, case studies, critical perspectives, and reviews on topics related to learning technologies and emerging technologies on how to support educators and learners to engage with sustainability issues in formal and/or informal learning contexts.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access:— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and many [other databases](#).

Journal Rank: [JCR](#) - Q2 (*Environmental Sciences*) / [CiteScore](#) - Q1 (*Geography, Planning and Development*)
