Message from the Guest Editor

Dear Colleagues,

Educational travel has come a long way since the days of the Grand Tour and takes many forms, travelling to places near and far, and staying anywhere for an overnight trip all the way up to a full year. Educational travel programs are regarded as powerful tools to develop global citizens and teach students about the world in which they live. However, global challenges to sustainability such as climate change, the divide between the Global North and South, and COVID-19 are forcing educational institutions to re-examine the role of educational travel and how it functions. In this Special Issue, we want to examine:

- How educational travel can be a vehicle to teach students about sustainability and protecting the environment;
- How educational travel can itself threaten sustainability and the environment and what strategies are programs developing to counteract this; and
- How educational travel can contribute to a more sustainable and greener world, through approaches such as citizen science, student research, and service learning.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access:— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and many [other databases](#).

Journal Rank: [JCR](#) - Q2 (*Environmental Sciences*) / [CiteScore](#) - Q1 (*Geography, Planning and Development*)
