Deadline for manuscript submissions:
closed (31 December 2021)

Message from the Guest Editor

Quality water shortage for human use and agricultural production is becoming a new norm around the world. One of the reasons for this shortage is increased encroachment of fresh water aquifer by saline water. Even the aquifers inland are getting encroached with salinity, thereby impacting crop production. In many cases, saline irrigation water increases soil salinity. As quality water shortage increases, there is also a rise in the use of recycled water. Recycled water increases soil salinity. There is an urgent need to estimate the economic damage caused by irrigation water and soil salinity in agriculture. It is equally necessary to identify adaptation and mitigation approaches to reduce soil salinity.

The following themes would be of particular interest (although this list is not exhaustive):

- Economic impact of soil salinity and irrigation water salinity
- Economic impact of aquifer salinity in agriculture
- Recycled water use, salinity, and economic impact
- Adaptation and mitigation to salinity

Prof. Dr. Marc A. Rosen
Faculty of Engineering and Applied Science, University of Ontario Institute of Technology, Oshawa, ON L1G 0C5, Canada

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.
Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
