Deadline for manuscript  
submissions:

**31 December 2021**

### Message from the Guest Editors

In recent decades, environmental sustainability has been attracting researchers and the industry to reduce carbon emissions and fossil fuel pollutions by considering renewable energy sources such as solar energy. One of the critical factors of having a sustainable society rests in energy conversion methods. Clean energy production, off-grid accessibility, and easy energy delivery are essential for sustainable energy conversion.

In this Special Issue, we aim to present up-to-date and high-quality research on energy harvesting and conversion sustainability. The focus will be on state-of-the-art approaches and methodologies of design, development, and the performance enhancement of various clean energy sources. The key topics are as follows:

- Energy management;
- Energy harvesting;
- Sustainable energy development;
- Co-gen and tri-generation;
- Ground source heat pumps;
- Zero-energy building;
- Heat recovery and innovative HVAC systems;
- Energy efficiency;
- Renewable energy;
- Building simulation;
- Sensible and latent heat storage;
- Thermal energy storage.

Faculty of Engineering and  
Applied Science, University of  
Ontario Institute of Technology,  
Oshawa, ON L1G 0C5, Canada

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:**— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High visibility:** indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and many [other databases](#).

**Journal Rank:** [JCR](#) - Q2 (*Environmental Sciences*) / [CiteScore](#) - Q1 (*Geography, Planning and Development*)
