Message from the Guest Editors

Dear Colleagues,

Worldwide, most organizations are involved with production, transportation and distribution, either as a provider or as a client. During the last few years, there has been growing societal and governmental pressure that challenges and forces organizations to focus more on environmental issues. Hence, a sustainable and energy-efficient strategy in production and transportation are of uttermost importance. In particular, adapting energy-efficient solutions leads to a reduction in the negative environmental impact and waste and improvements in the efficient use of energy and resources as well as the increase on the personnel satisfaction and health. However, this strategy must also consider quality and cost issues to become successful.

This Special Issue seeks to understand the potential impacts of addressing scheduling problems in production and transportation that focus on environmental and social indicators (e.g., waste, defective rate, fuel consumption, and personnel safety and satisfaction)...

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access:— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and many [other databases](#).

Journal Rank: [JCR](#) - Q2 (*Environmental Sciences*) / [CiteScore](#) - Q1 (*Geography, Planning and Development*)
