Message from the Guest Editor

Numerous climate mitigation policies and industry-level initiatives notwithstanding, energy generation-related greenhouse gas emissions currently still represent the largest contributing factor to anthropogenic climate change. As physical climate impacts are materializing at an accelerating rate all over the planet, public attention has been shifting towards energy-related externalities. This issue will focus on how global capital flows can be steered more effectively towards green low-carbon energy infrastructure projects. Global infrastructure debt providers are shifting away from carbon-intensive projects, with the European Investment Bank announcing in November 2019 that it will phase out lending to fossil fuel projects by 2021.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access:— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and many [other databases](#).

Journal Rank: [JCR](#) - Q2 (*Environmental Sciences*) / [CiteScore](#) - Q1 (*Geography, Planning and Development*)
