Deadline for manuscript submissions:

**closed (31 December 2022)**

### Message from the Guest Editors

Significant efforts to decouple economic growth and waste generation are required. Several technological and non-technological barriers exist according to different industrial sectors and value chains. In particular, in the new European Circular Economy Action Plan, seven key value chains have been identified as the most urgent to effectively shift to more sustainable production and consumption patterns, which are: electronics and ITC; batteries and vehicles; packaging; plastics; textiles; construction and buildings; and food, water and nutrients.

Starting with these value chains, but not exclusively, this Special Issue of Sustainability aims to collect reviews and research on sustainable and circular models and solutions to manage and reduce waste. The main focus is on technological innovations, to both prevent waste generation and recover, recycle and reuse them as new resources and materials, in the same or in other value chains.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
