Message from the Guest Editors

This Special Issue focuses on strategies to foster increased entrepreneurial endeavors and innovations while strengthening sustainability and mitigating climate change. Since *Sustainability* is a cross-disciplinary leading journal devoted to the study of different aspects of sustainability, we welcome contributions from several disciplines focusing on entrepreneurship, innovation, and sustainability in the aftermath of the COVID-19 outbreak. The analyses should emphasize strategies that induce more entrepreneurial efforts and higher innovative activities aiming at providing sustainability. Such strategies, depending on the level, may imply rethinking corporate strategies, initiating new alliances, or financing new ventures and innovations in novel ways. New forms of and channels for entrepreneurial activities, networks and organizational structures are conceivable. Economic policies, involving incentives and/or regulations, and their optimal design and deployment is another critically important area.
