### Message from the Guest Editors

Dear Colleagues,

The aim of this Special Issue is to explore the relationship between an entrepreneurial orientation (EO) and sustainable development. Entrepreneurship, as the driving force behind economic development and transformation, has a crucial role to play in shaping the nature of this development. Research on EO has a long pedigree whereby it has frequently been explored from the view of its impact on business performance. However, the focus on firms aside, the concept can and has been more widely used to apply to individuals, different organisational types, e.g., higher education institutions, and with a focus on sustainability.

We are interested in both conceptual and empirical work that can further our understanding of the nature and characteristics of entrepreneurial orientation, extending its implications into the sustainability domain. We think valuable contributions could be made also in relation to promoting the UN's Sustainable Development Goals.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
