closed (10 September 2023)

Message from the Guest Editor

Dear Colleagues,

Environmental governance is an essential determinant of sustainable development. This Special Issue welcomes studies that consider ecological, social, economic, or interdisciplinary perspectives of environmental governance and sustainable development in forest, agriculture, agroforestry, and urban land uses, at any spatial scale (individual, farm, city, regional, or global scale). In particular, this Special Issue will include papers that examine one or more of the following general themes for providing a better understanding of environmental governance issues, such as soil deterioration, climate change, biodiversity, water, air quality, ozone layer, nuclear risk, transgenic organisms, precautionary principle, and socioenvironmental conflicts; the main drivers of environmental degradation, such as economic growth, consumption, destruction of biodiversity, population growth, pollution, and destructive agricultural practices that lead to land degradation; and the impacts and consequences of main environmental governance agreements such as the Rio Conventions and Multilateral Environmental Agreements.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
