### Message from the Guest Editors

Scientific contributions will be accepted within the following six priority areas for promoting pro-environmental behaviors and green practices:

1. Effective strategies or practices for promoting scientific research, policy, media, and interpersonal communication concerning climate change.
2. Effective strategies or practices for leveraging social norms to facilitate collective efforts toward adaptation and mitigation.
3. Effective strategies or practices for leveraging motivation to support sustainable development goals.
4. Application of modern technologies (such as information and communication technology, big data analysis, artificial intelligence, and robotics technology) for environmental and green education.
5. Use of modern technologies for enhancing engagement in sustainability at various levels (e.g., the global, state, local, organizational, societal, and individual levels).
6. Innovative or interdisciplinary approaches to promote pro-environmental behaviours and green practices.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
