Message from the Guest Editor

Sustainability in times of major transitions requires resilience, the ability of systems and all their stakeholders, beyond avoiding negative externalities, to continue to function and pursue their development objectives, regardless of shocks or environment changes. E.g., for territories, the capacity to cope with shocks but also to better adapt to and resist chronic stresses. In order to allow a constructive dialogue with all specialists in the field (sustainable development, sustainability, adaptation, ecological transition, etc.), we opt for a broad definition of the term “resilience”. We expect this Special Issue will become a major reference on how to evaluate resilience. Hence, keep in mind when writing that your readers may be practitioners, consultants or leaders, or academics: readability and illustration with regard to concrete cases will be a plus.

an Open Access Journal by MDPI

Applied Science, University of
Ontario Institute of Technology,
Oshawa, ON L1G 0C5, Canada

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
