Deadline for manuscript  
submissions:

**closed (31 January 2009)**

### Message from the Guest Editor

Sustainability can apply to the (nearly) complete recycling of materials in large systems over long periods of time. Astrophysical cycles include the incorporation of gas clouds into stellar and planetary systems which, in turn, evolve and redistribute the (now enhanced) material throughout the galaxy through, for example, supernovae which generate all elements heavier than hydrogen and helium. On Earth recycling of tectonic plates sustains life on our planet via biogeochemical cycles such as the carbon-silicate cycle.

Papers relating to the long-term sustainability of technical civilizations can be submitted. Papers that address the sustainability of such systems -- their lifetimes and mechanisms -- particularly as they apply to long-term life on Earth -- will be appropriate.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:**— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High visibility:** indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and many [other databases](#).

**Journal Rank:** [JCR](#) - Q2 (*Environmental Sciences*) / [CiteScore](#) - Q1 (*Geography, Planning and Development*)
