Message from the Guest Editors

Family farms sector will be the topic in the academic and public debate over the coming years. The premise for such thinking is the fact that family farms continue to be the primary source of food supply in both developed and developing countries. In addition, due to their multifunctional nature, they provide specific public goods for which public demand is growing. However, family farms face many socioeconomic and environmental problems, such as relatively low incomes and productivity of inputs, vulnerability to climate change or lack of succession that may hinder sustainable development of these farms. Furthermore, the problems of the family farming sector often have a peculiar character regarding different countries and world regions. Understanding this diversity, as well as individual points of view of family farming issues, is a particular contribution to the theory of agricultural economics and closes the gap in this regard.

This Special Issue of *Sustainability* is dedicated to all those whose area of interest includes issues of family farming and sustainable rural development.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access:— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and many [other databases](#).

Journal Rank: [JCR](#) - Q2 (*Environmental Sciences*) / [CiteScore](#) - Q1 (*Geography, Planning and Development*)
