Message from the Guest Editor

More often than not, in the recent past, food production for humans has been discussed in great detail, including different dimensions of environment, health, and economics. Without a doubt, one can accept and acknowledge that the human population during the 20th century had the privilege to utilize natural resources without any limits and little attention to its sustainability. Whereas, the scenario is different now, with the massive demand for natural resources and its impacts on the environment have severely constrained every aspect of human life. Food production needs to be stepped up with the available resources for the ever-increasing global population combating the most challenging issue of global warming. With this background, it is evident that food researchers and the food industry have to come up with sustainable solutions in the production and processing of food to uphold food security and human health. Articles accepted in this special issue may increase awareness among the researchers, policymakers, industry, and global citizens for sustainable agriculture and food production.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access:— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and many [other databases](#).

Journal Rank: [JCR](#) - Q2 (*Environmental Sciences*) / [CiteScore](#) - Q1 (*Geography, Planning and Development*)
