Message from the Guest Editors

Dear Colleagues,

This Special Issue is seeking original, unpublished papers that describe recent advances in various field of food industry and food supply chain ecosystems toward economic, environmental and social sustainability. The required target is to provide evidences of where and how quantitative models, methods and support-decision tools, as well as advanced technology, can aid the design and management of more sustainable food operations from-farm-to-fork, throughout cropping, processing and packaging, storage and distribution activities.

This Special Issue invites timely and advanced research papers, but even case studies supported by multi-disciplinary quantitative approaches for an effective assessment of the as-is food operations and a pro-active re-design toward sustainability.

Dr. Riccardo Accorsi

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
