Message from the Guest Editors

Dear Colleagues,

10 years are left only in order to reach the Sustainable Development Goal 12.3 aiming to halve food waste at retail and consumer levels per capita and to reduce food loss along up-stream food supply chain until 2030. Food loss and waste finally has reached global awareness and numerous activities have been implemented recently to tackle the problem on different levels of the food supply chain. Nevertheless, the quantification of food loss and waste on national level is still a challenge and suffers from data gaps. Each quantification methodology bears pros and cons which have to be counterbalanced with national legal, societal, economic and structural frameworks already in place as well as available financial resources versus expected benefit towards knowledge increase. Beside the quantification of FLW generation itself, also the setup of reliable long-time national time series, the comparison of produced data with other countries and the holistic impact assessment of implemented prevention measures or the effectiveness of prevention policies challenges decision makers, researchers and practitioners on a global scale.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access:— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and other databases.

Journal Rank: [JCR - Q2 \(Environmental Sciences\)](#) / [CiteScore - Q1 \(Geography, Planning and Development\)](#)
