Message from the Guest Editors

Foresight research is gaining importance, and is understood as a future-oriented managerial competence, a company's capability or as a systematic, participatory process focused on gathering knowledge about future-oriented vision-building and its impact on today's decisions and mobilizing joint actions, faced with the unpredictability of the environment.

This Special Issue covers a diverse range of substantive theoretical and methodological developments in the field of foresight studies. The Issue is addressed to original research related to the recent developments of Industry 4.0 and its positive and negative futures, strategic foresight at the company, regional, and city levels, as well as strategic planning and its links with sustainability. The problems of integrating foresight with innovation process management, technology assessment, and organizational capabilities evaluation are also within the scope of interest.

Applied Science, University of
Ontario Institute of Technology,
Oshawa, ON L1G 0C5, Canada

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
