Deadline for manuscript  
submissions:  
**closed (30 April 2023)**

### Message from the Guest Editor

Physical transport remains the lifeblood of the city. Transport within cities will doubtlessly return and grow but it might grow back differently, supporting changes in daily life. This Special Issue will focus on those future scenarios as an outcome of an analysis of research trends, accumulated empirical evidence, exemplary case studies with global significance, cross-sectional studies, and activity surveys. All urban scales are included in our consideration. Global reach is also needed, given that the problems for an urban future are global, even when the short-range solutions may be local in nature. Forward-looking reviews, field investigations, city comparisons, local area studies and comparisons, transport system investigations of all kinds, among other types of work, are typical of the sources of new urban mobility futures. This Issue will call on researchers across these urban mobility domains to focus their work on the meaning of research findings for our urban futures. In this way, we hope to address the important scientific needs to translate focused research findings into directions for the city.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
