Message from the Guest Editor

My hope is that this issue will contribute to twin, related topics. The first is to do with the role of state, capital, labor, knowledge, and the third sector in environmental activism. The second is about the specificities of cultural policy in this area, which might cover anything from commercial TV networks' internal guidelines and practices on electricity use or harming animals, through to unions organizing electronic-waste recyclers, or governments publicizing the carbon footprint of museums and football stadia.
