Deadline for manuscript  
submissions:

**30 November 2021**

Sustainable forest development is a challenge in terms of both environmental protection and the economy. The forest's ability to produce oxygen, collect carbon and provide ecosystems for many species is vital for global and local environmental protection. Maintaining the balance between forest protection and forest production is crucial to preserving forests.

This Special Issue will contain original scientific papers focusing on the application of GIS in sustainable forest development. The submissions will cover topics including but not limited to:

- Spatial modelling in forestry;
- Web services and portals for forestry;
- Spatial databases for forest modelling;
- Data-mining methods in forest development;
- AI models in GIS applied for forest modelling.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:**— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High visibility:** indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and many [other databases](#).

**Journal Rank:** [JCR](#) - Q2 (*Environmental Sciences*) / [CiteScore](#) - Q1 (*Geography, Planning and Development*)
