Applications of Geographic Information Technologies in Sustainable Mining

Guest Editors:

Dr. Jan Blachowski

Department of Geodesy and Geoinformation, Wrocław University of Science and Technology, 50-370 Wroclaw, Poland

Prof. Dr. Jörg Benndorf

Department of Mine Surveying and Geodesy, TU Bergakademie Freiberg, 09599 Freiberg, Germany

Dr. Woiciech Milczarek

Faculty of Geoengineering, Mining and Geology, Wroclaw University of Science and Technology, Wroclaw, 50-370, Poland

Deadline for manuscript submissions:

closed (30 September 2020)

Message from the Guest Editors

Sustainability has become a key issue for industries globally, including mining. Mineral excavation benefits economies and at the same time impacts the surrounding environment and society. Geographic information technologies, including data acquisition techniques, data processing methods and analytical methodologies play an increasing role in providing reliable information and prediction models facilitating the minimization of the adverse effects of mining operations.

This Special Issue will comprise a selection of papers addressing current and state of the art methods and techniques of remote sensing, as well as spatial analysis and modelling applied to problems associated with the effect of mining on the environment.

The purpose of this Special Issue includes the demonstration of new methods and techniques in the processing and interpreting of remote sensing data for the observation and monitoring of mining grounds, including the integration of data from different sources and GIS; the presentation of enhanced and new methodologies for analysis and assessment of the state of areas under the influence of mining and the condition of engineering objects in mining areas.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario Institute of Technology, Oshawa, ON L1G 0C5, Canada

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international Open Access journal which provides an advanced forum for research findings in areas sustainability related to and sustainable development. Sustainability publishes original research articles, review articles and communications, I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
