Deadline for manuscript submissions:

closed (30 October 2021)

Message from the Guest Editors

Dear Colleagues,

The events of 2020 have challenged the way the built environment is designed, managed, and experienced. Droughts, bushfire, and a global pandemic will no doubt force the construction sector to find ways of coping with unpredictable events and respond to a wider and more complex set of requirements. The post-2020 environment urges new design processes, construction techniques, occupancy practices, and management strategies to increase built-environment resilience to extreme, uncontrollable, and unpredictable events while offering healthy and sustainable environments to people. This Special Issue of *Sustainability* invites papers that address this topic, reflect on what should be the new concept of sustainability for the built environment, and advance knowledge on new research directions post 2020.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
