### Message from the Guest Editors

The current call for papers seeks for contributions (either theoretical or applied in nature) to examine, discuss and evaluate the challenges facing the hospitality sector. The current Special Issue aims to provide a comprehensive guide for managers, practitioners, decision makers as well as academics working in the field, on how best to prepare for the future.

The Special Issue addresses (not exclusively) the following issues:

- Smart hotels
- Technological innovations
- Visitor | Consumer Preferences
- Interactivity in a hospitality setting
- Competitive practices in hospitality
- Environmental Sustainability

However, other proposals in relevant areas or issues within hospitality are also welcomed.
