### Message from the Guest Editors

Dear Colleagues,

Changes in eating patterns are an important step for building sustainable food and agricultural systems. It is essential to understand consumers' interests in those diets, factors that affect their decisions, and how policy can help to move current diets towards more sustainable ones. This Special Issue will comprise papers covering a wide range of aspects related to sustainable food consumption. It will explore—in developed and developing countries—food-purchasing patterns and consumers' interest in food products with sustainable attributes. Therefore, we particularly encourage empirical papers that focus on understanding the demand for sustainable food products, consumers' response to the introduction of new products associated with more sustainable primary production (including both conventional and organic production) processing, transport and packaging, and studies evaluating policies encouraging consumers to adopt sustainable diets (e.g., sustainability labels, marketing, taxes, and subsidies). Furthermore, papers on novel methodologies for sustainability assessment of diets are also highly encouraged.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
